

VTS-3G
VTS-3G

Vehicle Tracking System

Function:

- Use USIM card, Support WCDMA 3G network and GSM network.
- Use video cables to connect CCD simulated camera externally.
- Support SMS/GPRS/ HSDPA/Internet data transportation (GPS / Internet will be illustrated in addition)
- Support mobile phone message to control and reach privacy security.
- Support alarm by SMS, voice call and video call.
- Built-in Li-ion battery, can work normally even in power off state.
- Monitor the place any time anywhere by video call.
- Monitor your vehicle from anywhere, through software, Google map with live video and audio facility.

Specification:

Content	Specification
Network	HSDPA, UMTS, EDGE, GSM/GPRS
Net Frequency	EDGE/GPRS/GSM 850/900/1800/1900 MHz
Channel	HSDPA/UMTS 850/1900Mhz or 900/2100 Mhz
Chip	SIRF3 Chip
3G Chip	WCDMA
GPS Sensitivity	-159dBm
GPS Accuracy	5m
Time to first initiate	Cold Status 45s, Warm Status 35s, Hot Status 1s
Input Voltage	12V – 24V Input
User-defined input alarm detection level	0V
Video form	MP4
Battery	Chargable Changeable 3.7V 800mAh Li-ion Battery
Standby	48Hours
Storage Temp	-40°C to +85°C
Operation Temp	-20°C to +55°C
Humidity	5%--95% non-condensing
Dimension	66x117x27 mm
Weight	256g
